

Environment Setup

Create a Flask Project

Team ID	PNT2022TMID02226
Project Name	Plasma Donor Application

Code :

A screenshot of the Visual Studio Code editor interface. The Explorer sidebar on the left shows a project structure with a folder 'P' containing a file 'app.py'. The main editor window displays the code for 'app.py'. The code imports Flask, creates an app instance, defines a route for '/' with a 'hello_world' function, and includes a main block to run the app.

```
app.py > ...
1  from flask import Flask
2  app = Flask(__name__)
3
4  @app.route('/')
5  def hello_world():
6      return 'Hello World!'
7
8  if __name__ == '__main__':
9      app.run()
```

Terminal :

```
C:\Windows\System32\cmd.exe X + -
Microsoft Windows [Version 10.0.22621.819]
(c) Microsoft Corporation. All rights reserved.

C:\Users\elair\Desktop\IBM_project\p>flask run
* Debug mode: off
WARNING: This is a development server. Do not use it in a production deployment. Use a production WSGI server instead.
* Running on http://127.0.0.1:5000
Press CTRL+C to quit
127.0.0.1 - - [15/Nov/2022 18:55:41] "GET / HTTP/1.1" 200 -
